Texas

Summary

Highly motivated and aspiring IT Security professional with foundational knowledge in cybersecurity principles, network security, and incident response. Eager to apply strong analytical skills and a passion for protecting digital assets to an entry-level security role. Possesses practical experience gained through coursework and hands-on labs, coupled with a commitment to continuous learning and contributing to a secure operational environment.

Experience

Cybersecurity Intern Lone Star Security Group Fort Worth, TX June 2024 - Present

- Assisted senior security analysts in monitoring security alerts and investigating potential threats using SIEM (Security Information and Event Management) tools.
- Participated in vulnerability scanning activities and assisted in generating reports on identified weaknesses.
- Helped with the documentation of security incidents and incident response procedures.
- Gained exposure to firewall rule management and basic network segmentation principles.
- Researched emerging cybersecurity threats and reported findings to the team.

IT Support Specialist Tech Solutions Inc. Arlington, TX August 2023 - May 2024

- Provided first-level technical support for hardware, software, and network connectivity issues for internal employees.
- Assisted with user account management, including password resets and access permissions.
- Performed basic system troubleshooting and ensured antivirus software was up-to-date on user workstations.
- Documented support tickets and resolutions in the company's ticketing system.
